

Leonel Gasparrini

Software Engineer

Professional Summary

Senior full-stack engineer with 13 years of experience building and scaling web applications, mainly with Ruby on Rails and React. I specialize in systems where a mistake costs money: checkout, payments, data that has to stay in sync across systems, and search that has to stay fast under load. I now work AI-first: Claude Code agents write the code, and I own the architecture, the review and what reaches production. Remote with teams in the US, Spain and Uruguay since 2017.

Technical Expertise

Languages	Ruby, JavaScript, Python, PHP, Java
Frameworks	Ruby on Rails, React, Redux, Node.js, Express, React Native
Databases	PostgreSQL, MySQL, Elasticsearch, Redis, MongoDB
AI tooling	Claude Code, agent-driven development from ticket to pull request
Tools	Git, Docker, CircleCI, RSpec, Jest, Sidekiq, Webpack
Practices	Agile/SCRUM, Code Review, System Design, TDD

Professional Experience

Dec 2025 – Present

Senior Full-Stack Engineer at SWARE, *for Elefta, USA (remote).*

Rebuilding Elefta's platform for watch dealers (inventory, memos and invoices, webstores and a nationwide B2B marketplace) to run leaner while shipping new features. The team works AI-first with Claude Code.

Key achievements:

- AI development framework: built with the team an internal framework around Claude Code that takes a ticket to a pull request, giving the agent the context it needs and enforcing the company's rules and conventions
- Same quality gates: every change goes through my review, a second developer's code review and QA on staging before production
- Delivery speed: work that used to take months now ships in days

Tech: Claude Code, Git, Code Review

Río Cuarto, Córdoba – Argentina
✉ *jlgasparrini@gmail.com*

Mar 2020 – Nov 2025 **Senior Software Engineer at GOAT Group**, *USA (remote)*.

Worked on the core checkout and payment flows of a marketplace with over a million sellers. Helped unify the systems of three acquired companies, improved performance in Rails and PostgreSQL, and collaborated with product and infra teams to keep the platform stable during high-traffic moments. Also contributed features across the React frontend and Sidekiq background jobs, and handled critical production incidents.

Key achievements:

- Checkout platform unification: consolidated the checkout systems of three companies, solving cross-platform challenges including unified promo codes, centralized shipping and a payment processing abstraction
- Payment infrastructure: built the Dwolla integration for wire transfers (React UI, Rails API, Sidekiq background jobs)
- Rails upgrade: led the migration from Rails 5 to Rails 7.2 with zero downtime
- Search performance: fixed N+1 queries, Elasticsearch sync issues and missing caching behind slow search

Tech: Ruby on Rails, React, Redux, PostgreSQL, Elasticsearch, Sidekiq, RSpec, Git, SCRUM

Aug 2019 – Jan 2020 **Senior Backend Engineer at Rootstrap**, *Uruguay (remote)*.

Contributed to a rental e-commerce platform enabling users to rent products, or automatically purchase them from third-party marketplaces when unavailable. Developed backend features and admin dashboard functionality, and extended payment processing and external API integrations such as Best Buy and Recurly.

Tech: Ruby on Rails, React, PostgreSQL, Sidekiq, Docker, CircleCI, RSpec, Git, SCRUM

Sep 2018 – Aug 2019 **Software Engineer at Toptive**, *Argentina*.

Worked on multiple client projects for US companies, moving between technologies and domains every 2–3 months. Notable projects: mobile retail KPI management app, logistics coordination platform, multi-tenant e-commerce system and medical data processing system. Deepened Node.js expertise while delivering features across full-stack and mobile applications.

Tech: React, React Native, Node.js, Symfony, Java/Maven, Firebase, PostgreSQL, Git, SCRUM

Oct 2017 – Sep 2018 **Software Engineer at Linkgua**, *Spain (remote)*.

Built an embeddable content engagement widget for a Spanish publisher, using semantic analysis to recommend related articles. Solved a critical DOM parsing issue that blocked client integration, parsing the page structure and injecting elements without disrupting layouts. Developed configurable display modes, integrated an advertising module and optimized backend performance, reducing load times. Deployed across multiple client sites.

Tech: JavaScript, RactiveJS, jQuery, PhalconPHP, MySQL, HTML5, CSS3, SASS, Git, SCRUM

May 2015 – Oct 2017 **Software Engineer (Technical Lead) at Concejo Deliberante Río Cuarto**, *Argentina*.

Led the digital transformation of the city council's legislative system. Started as an intern and was promoted to technical lead after 6 months. Primary technical decision-maker, designing and building a workflow management platform from scratch. Gathered requirements from government stakeholders, mentored a junior developer (taught Rails from scratch) and delivered a working system handling complete legislative procedures from submission to official approval.

Tech: Ruby on Rails, MySQL, PostgreSQL, JavaScript, TDD (RSpec, Cucumber), Git, SCRUM

Nov 2013 – Oct 2017 **Software Engineer at Plum**, *Argentina*.

First professional role, where I grew from junior to mid-level engineer. Built web applications for local and US clients, including SaaS platforms for hotels, real estate management systems, high school administration software, an appointments app and assistive technology. Learned Rails, TDD and agile practices under senior engineer mentorship.

Tech: Ruby on Rails, PostgreSQL, JavaScript, jQuery, RSpec, Cucumber, Capybara, Git, SCRUM

Education

2010 – 2014 **Analyst in Computer Sciences**, *Universidad Nacional de Río Cuarto*, Río Cuarto, Argentina.

Thesis: Distributed Outsourced Software Development using Eiffel as design-by-contracts programming language

Teaching Assistant: Data Structures & Algorithms II (2014–2015). Taught advanced algorithms to CS students, conducted lab sessions and mentored on problem-solving approaches.

Achievements

2015 ACM ICPC Regional Programming Contest – 1st Place (Coach & Contestant)

2014 ACM ICPC Regional Programming Contest – 3rd Place (Coach & Contestant)

2013 ACM ICPC Regional Programming Contest – 2nd Place (Coach & Contestant)
